## Summary

Drupal Expert with over 15 years of experience across frontend, backend, and DevOps. Committed to delivering business-efficient solutions with a strong focus on performance, scalability, and highest quality. Successfully led and developed impactful web solutions for NGOs, healthtech, edutech, and enterprises across Europe and the US. Experienced in leading and mentoring cross-functional teams. Active contributor to the Drupal community and speaker at international conferences.

## Work experience

SystemSeed

(2020 – 2025)

### Lead Drupal Developer

- Led the company's most technically complex project (Drupal + React) for a large international charity, improving performance by 25% while delivering optimal solutions for client business needs.
- Led and mentored a team of 6 developers, improving team performance and fostering motivation.
- Delivered 5 enterprise-level projects (6–12 months) with teams of 3-4 developers, reducing delivery time by 30% through reusable solutions and CI/CD automation.
- Developed a base theme for Drupal that became the company standard across all projects, unifying approaches and accelerating development.
- Co-created and administered the in-house DevOps solution, saving up to 50% of time on delivery flow.
- Developed several integrations of Drupal projects with React applications and CRM systems.
- Performed multiple platform upgrades and migrations, keeping security and long-term maintainability.

Self-employed (Freelance)

(2017 – 2020)

### Drupal Developer

- Successfully delivered over a dozen small to mid-scale Drupal projects in international teams, consistently meeting tight deadlines while maintaining exceptional quality.
- Developed numerous high-quality custom Drupal themes and admin UI, precisely aligned with design specifications and UX requirements.
- Developed several reusable themes and modules to accelerate Drupal project development.

Agregator

(2010 – 2017)

### Lead Drupal Developer

- Led the development and support of Drupal projects.
- Administered IT services and DevOps across the company.
